

## **Announcement: Wilder Fellowship Opportunities 2022**

The Department of Physics and Astronomy invites applications for Wilder Fellowships.

This opportunity is for an undergraduate doing full-time work in the Department during an off term. Typically, it is used summer term, though can be any term in which a student is not taking courses. This summer, COVID permitting, Wilder Fellows will be part of the community present in Wilder Hall.

This year we are offering two very different Fellowships. One will be a research fellowship, pursuing a project with a faculty member, who must agree ahead of time to supervise the project. The second is a job cataloging and documenting the Department's extensive collection of lecture-demonstration equipment, in collaboration with Ralph Gibson, who is retiring after having managed this resource for a half-century.

Applications should be submitted as PDF files. For the research option, the application must include:

- 1) The student's name
- 2) The name of the advisor who has agreed to supervise the project,
- 3) A brief description of the project,
- 4) An estimated schedule for the work, including start and end dates, and
- 5) A listing of other funding, if any, available to support the work.
- 6) On a separate page, the student's Curriculum Vitae, with an emphasis on background in physics and astronomy.

Awards can be for up to 40 hours/week for up to 10 weeks at \$15/hour. Applications should be sent to Meg Whitlock [[Megan.P.Whitlock@Dartmouth.edu](mailto:Megan.P.Whitlock@Dartmouth.edu)] no later than Monday, May 2<sup>nd</sup>, as they will be reviewed by the faculty committee that week.

Questions can be referred to the faculty committee: Profs Yi-Hsin Liu, Kevin Wright and John Thorstensen.
